

## Job opening

Specialist in Radiochemistry (PhD)

France (Bruz)

Starting September 1<sup>st</sup> 2017

ETABLISSEMENT : TrisKem International SAS

TrisKem International manufactures and develops resins for the separation of radionuclides used in geochemistry, environmental monitoring, radiation protection and nuclear medicine. TrisKem's products and applications are a standard technology and employed in national and international accredited laboratories and monitoring agencies.

Triskem is looking to strengthen its R&D team by adding the following skills:

- Radiochemistry and radioanalytical chemistry
- Separation chemistry and sample preparation
- Nuclear measurement techniques (alpha spectrometry, liquid scintillation counting,...)
- ICP-MS, ideally including hyphenation (FAST, IC,...)
- Excellent communication skills (oral presentation, poster, technical support, discussion with customers,..)

You will work in close collaboration with a small multifunctional and multicultural team. You are open minded, creative, organized and looking for a new challenge. You have the capacity to adapt to new situations and projects. You are able to work on several projects in parallel. Please send your CV to [shappel@triskem.fr](mailto:shappel@triskem.fr)
