

PSI-FELLOW-III-3i Programme Call for applications

Important dates:

Call starts: September 1st, 2022
 Deadline for applications: November 30, 2022, 24:00 CET
 Interview period at PSI: February 20 – March 3, 2023

Scope

The 3rd PSI-FELLOW Postdoctoral programme aims at increasing the European-wide mobility possibilities for training and career development of experienced researchers, in line with the objectives set out in the activity heading “Life-long training and career development”, of the Marie Skłodowska-Curie work programme. The beneficiary aims to broaden and deepen a researcher’s individual competence shortly after having obtained a doctorate, in particular in terms of acquisition of multi- or interdisciplinary skills and intersectoral experiences.

Call for applications

The research theme has to be discussed in strong collaboration with its principal investigator (PI). We strongly encourage female scientists to apply. The list of themes and any other relevant information can be found on our website as of September 1st, 2022: www.psi.ch/psi-fellow

PSI’s four grand research focus areas:

- Materials and Matter
- Energy and Environment
- Health and Life-Sciences
- Accelerator Concepts, Beam Characterization Methods and Detectors

After the evaluation, successful applicants will be interviewed. Interviews are scheduled during the two weeks: February 20 – March 3, 2023.
